PLAY BIKE TEST

**SSR**  
MOTORSPORTS

*In stock form you want to choose your jumps carefully. Both the SSR SR150 and SR189 have plush, soft trail suspension that is soft for track use.*

*Going down the straights, the SRs hooked up well and accelerated briskly. The suspension is at its best on small, choppy bumps.*

**GOOD STUFF**

There is a long list of good stuff on the SR play bikes. The forks have 37mm tubes, so they are on par with the best of the racing mini cycles for fork size (with the exception of the KTM). The shock shaft is 16mm. It wasn't too long ago that those were

numbers worth bragging about for a full-size motocross bike. Thankfully, SSR cleverly copied more than the KTM look. The bike uses a single-bolt seat attachment and has a large, side-access airbox with an oiled-foam air filter large enough for a 450cc bike. The tapered bar with bar pad, adjustable handlebar mount location

and wide footpegs are also in the plus column. No spark arrestor is a major drawback in many parts of the country, and as yet we don't know of anyone who makes a spark arrestor for the SSRs. We didn't weigh the bikes, but they did feel a little heavier than the Honda CRF150F, and the CRF150F is no lightweight.

**SSR MOTORSPORTS SR150 & SR189 SPECS**

	SR150	SR189
Engine type	Electric-start, air-cooled, 4-stroke single-cylinder	
Displacement	150cc	189cc
Bore x stroke	62mm x 49.6mm	65.5mm x 56.2mm
Fuel delivery	28mm carburetor	30mm carburetor
Transmission	5-speed	5-speed
Final drive	Chain	Chain
Fuel tank capacity	1.58 gal.	1.58 gal.
Spark arrestor	No	No
EPA legal	No	No
Running weight	227 lb.	236 lb.
Wheelbase	51.5"	52.0"
Ground clearance	11.0"	12.5"
Seat height	33.5"	35.0"
Tire size:		
Front	Innova 70/100-17	Innova 70/100-19
Rear	Innova 90/100-14	Innova 90/100-16
Suspension		
Front	37mm inverted, adj. rebound/compression	
Rear	Remote res. single shock w/ linkage, adj. preload/rebound	
Country of origin		China
Suggested retail price	\$1899	\$2199
Manufacturer	SSR Motorsports, <a href="http://www.ssrmotorsports.com">www.ssrmotorsports.com</a>	

PLAY BIKE TEST

# SSR MOTORSPORTS

We would guess that the inverted fork is similar to a Showa design. It is certainly beefy enough for any play bike chores.

The SSR 150's motor is a happy revver, but it runs well down low. There is a giant air filter element under the side plastic.

It actually weighs roughly the same as a CRF450R motocross bike. None of our riders complained about the weight, but it will be an issue for smaller riders. Maddy and Chase both normally ride full-size bikes. We also swapped bikes with a CRF150F rider, and she wasn't bothered by the weight but did praise the suspension.

The rear brake is great, but the front takes a fair amount of effort. The lever feel is solid, but the stopping power comes in smoothly without a lot of bite.

Where the SSRs really shine is price. At \$1899 for the 150 and \$2199 for the 189, they are considerably less expensive than other play bikes with

*The swingarm looks aluminum, but it is steel. The hubs look large enough for a full-size bike.*

*This muffler looks suspiciously like a KTM two-stroke muffler, and the sound is reasonable, but no spark arrestor is a problem.*

*It is nice to have the choke right where you can get at it easily. The clutch must be pulled in before the bike will start.*

far more basic suspension packages. The 189 looks and feels great after a non-stop, rider-swapping day at the track and racing a Grand Prix. During that time the bike crashed twice. Both times we had to clean sand out of the throttle, but otherwise the bike looks and feels new. One fall bent the brake pedal a little, but we were able to straighten it, and it suffered no ill effects.

Obviously, it is too early to say anything about the SSR minis' long-term reliability, but so far they feel plenty stout, and they are backed by a 60-day warranty. We have seen the warehouse, and it is impressive. SSR claims to have parts for every bike it has sold. Hopefully, we can get some serious miles racked up and see how it goes. We think it will go well. □

## CONNECTED TO THE THRILL

When you invest in a set of the worlds finest high performance silicone hoses, you are not only upgrading your bike. You are connecting to a feeling, an attitude and a riding thrill only SAMCO sport can give you. Are YOU connected?

**MADE IN BRITAIN**     #GETCONNECTED

Silicone Hoses handcrafted in Britain. Victorious around the world. For the full range and to check availability for your bike visit [samcosport.com](http://samcosport.com)
